CARE INSTRUCTIONS

General Maintenance:

Vacuum regularly to remove dust and grit.
Clean spills and stains quickly to prevent them setting in
If being used in a spill/stain-prone area specify a stain repellent finish.

For appearance retention we recommend regular professional cleaning to give your furniture a longer life.

Natural Fabrics:

In addition to regular vacuuming, wool and other natural fibres can usually be cleaned using branded upholstery shampoo.
For a deeper clean, it’s best that wool be dry cleaned, as over wetting cause shrinkage and change in appearance.
Never apply bleach, ammonia, alkali or strong acids to wool upholstery.

Synthetic Fabrics:

Vacuuming is the best regular maintenance, followed by speed of action to remove spills and stains rapidly as soon as they occur.
Most synthetic fabrics can be wiped down with a water soaked damp cloth without fear of damaging the fibre or removing the colour.
Stubborn stains can be removed with upholstery shampoo.

Leather:

Leather should be regularly dusted with a soft cloth and vacuumed with soft brush extension.
Most types of Anilines can also be treated with specialist products to help preserve, colour, finish etc..
As leather is natural material, discrepancies in surface texture and ‘puddling’ in seat areas is to be expected.
