A woman with dark, curly hair is sitting on a bright yellow modular sofa. She is wearing a white, short-sleeved, belted blazer and white trousers. She is looking off to the side with a slight smile. The background is plain white.

Modular seating

A sculptural modular seating collection designed to elevate modern workspaces. With its flowing curves, layered backrests, and refined detailing, Ally brings together comfort, flexibility and sophistication.

**Ally,
our most
versatile
range**

Ally

modular seating range

Introducing the Ally Range, a marvel of 2020 Furniture Design that seamlessly blends versatility, dynamism, and craftsmanship to redefine breakout areas. This range is a testament to the artistry of curves and radiuses, showcasing the full spectrum of capabilities that contemporary design can offer.

Modular features

Ideal for those who appreciate the aesthetic appeal of curves in their spaces, the Ally Range is a fantastically versatile collection that excels in landscaping seating, reception areas, and collaborative zones. Its thoughtful design and modular features make it a perfect fit for dynamic environments where adaptability is key.

Modern workspace

To meet modern workplace demands, Ally comes with optional features like A/C and USB ports, blending productivity and comfort for contemporary office spaces. In summary, Ally is a dynamic seating range offering flexibility, style, and functionality ideal for collaborative spaces, enhancing acoustic privacy, and making a bold design statement in your space.

Endless configurations
to suit evolving spaces and needs.

Meticulous craftsmanship and
timeless forms for lasting impact.

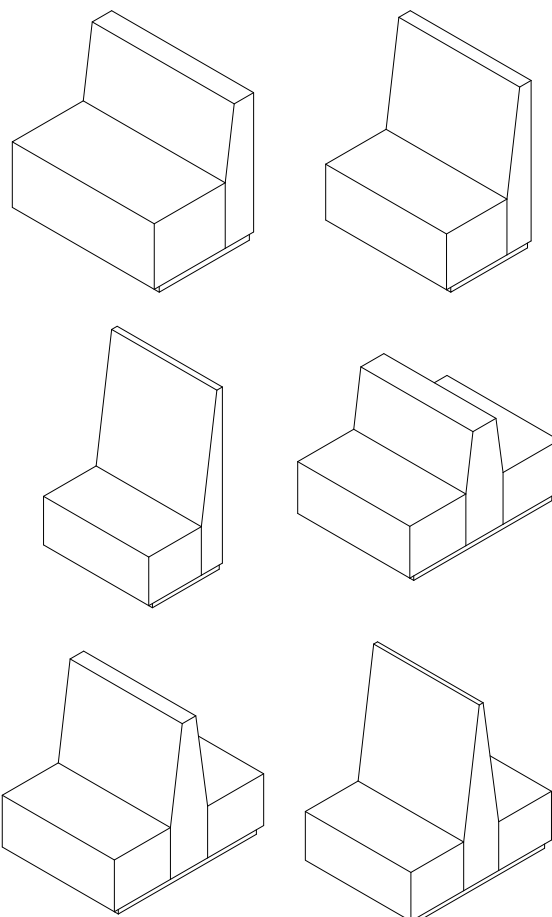

Benny

linear seating system

Benny is a versatile and stylish seating range designed for offices, universities, and dining spaces. Its sleek, linear form allows units to be arranged back-to-back, creating flexible layouts with smooth curves and angled corners to suit a variety of interiors. Built with high-quality craftsmanship, Benny is durable and well-suited for high-traffic environments.

It can be tailored to different design preferences with options such as a kickboard or full upholstery to the floor, along with a wide selection of fabrics. Additional features, including integrated power modules and multiple height options, make it easy to create comfortable, functional, and private seating arrangements.

Seamless configurations to suit evolving spaces and layouts.

Responsibly sourced materials with a focus on durability.

Faith

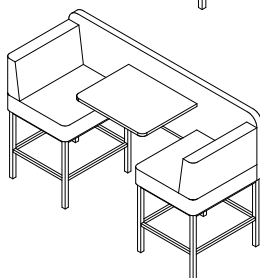

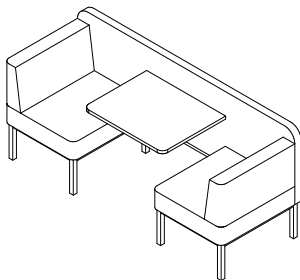

compact seating

Faith is a comfortable and functional furniture range designed for small meetings, quick conversations, relaxation, and collaboration in compact spaces. It features a durable 40mm powder-coated frame, along with a plush seat and backrest and an integrated table for added convenience and support.

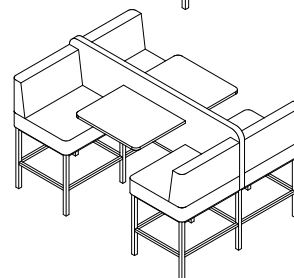

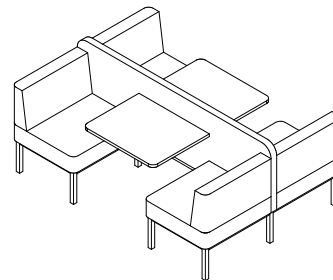

With both low and high versions, Faith offers a sleek, contemporary design in multiple configurations, including two- and four-seater back-to-back units and two-seater sofas. It's a practical and stylish solution for offices and university environments.

Seamless configurations to suit evolving spaces and layouts.

Responsibly sourced materials with a focus on durability.

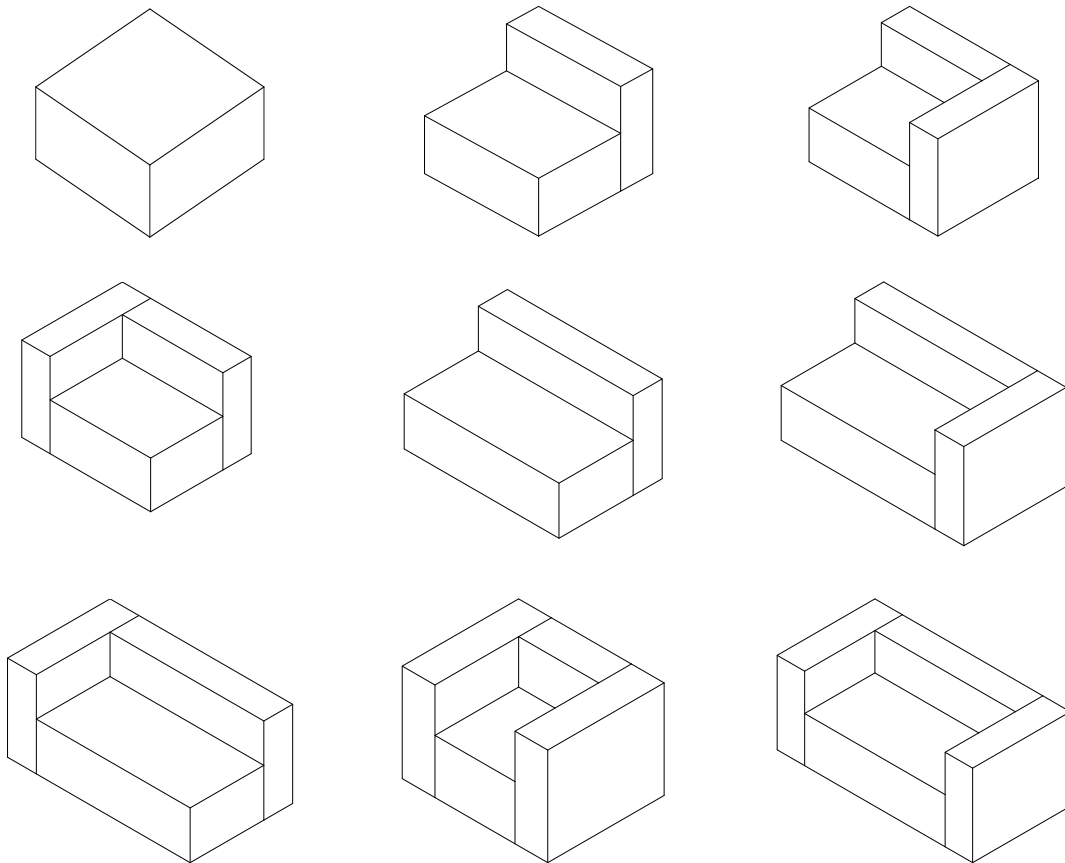

A woman wearing a white blazer is sitting on a blue modular sofa. Her hands are resting on her lap. The sofa has a textured, ribbed fabric. The background is plain white.

Lincs

Flexible modular seating

A refined modular seating collection that combines comfort, versatility, and a professional aesthetic. With its deep, well-cushioned form and clean lines, Lincs delivers a luxurious seating experience suited to modern workplaces, educational environments, and leisure spaces.

Lincs

modular seating range

Lincs is designed to bring together comfort and style while supporting flexible space planning. Its robust construction and plush design create an inviting seating solution that enhances both relaxation and visual appeal. Ideal for breakout areas, Lincs helps create calm, welcoming environments that encourage productivity and ease.

Customisable configurations

Lincs offers a wide range of layout possibilities, including options with or without backs and arms. This flexibility allows you to shape spaces to your needs—whether for informal meetings, waiting areas, or collaborative zones—while maintaining a cohesive design.

Encourages interaction and connection in shared spaces.

Designed for contemporary spaces

Built for high-traffic environments, Lincs supports comfort and everyday functionality. Its soft structure encourages relaxation, while its refined appearance elevates the overall space, helping create calm, welcoming environments.

Meticulous craftsmanship and timeless forms for lasting impact.

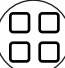

Milo

lounge seating

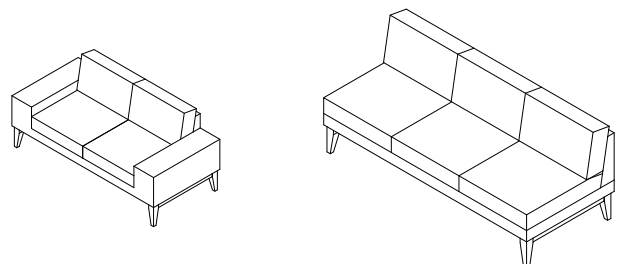

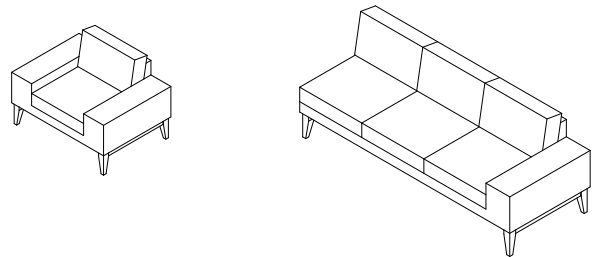

Milo is a modular seating system designed for relaxed, informal environments. Its low-profile form and clean geometry encourage a natural, comfortable sitting posture, helping to reduce pressure on the body while creating a calm, grounded atmosphere.

Soft, welcoming, and thoughtfully designed, Milo is ideal for breakout areas, lounges, and casual meeting spaces where comfort and flexibility matter. Its adaptable modular design allows for a variety of configurations, making it easy to shape spaces to suit different needs.

With its refined, understated aesthetic, Milo brings together comfort, functionality, and quiet sophistication—offering a versatile seating solution for contemporary interiors.

 Adaptable configurations to suit different layouts and spaces.

 Reduced height creates a grounded and calming presence.

Mono

focus pod system

MONO is a compact, flexible pod system designed to support focus, privacy, and wellbeing in modern workspaces. Ideal for calls, quiet work, and moments of concentration, it helps create balance in busy environments.

Its enclosed design enhances comfort and acoustic separation, while a wide choice of fabrics and MFC finishes adds warmth and visual appeal. With integrated lighting, a PIR sensor for energy efficiency, and a simple installation process, MONO is a practical and cost-effective solution for contemporary offices.

Enclosed space designed for concentration, calls, and quiet work.

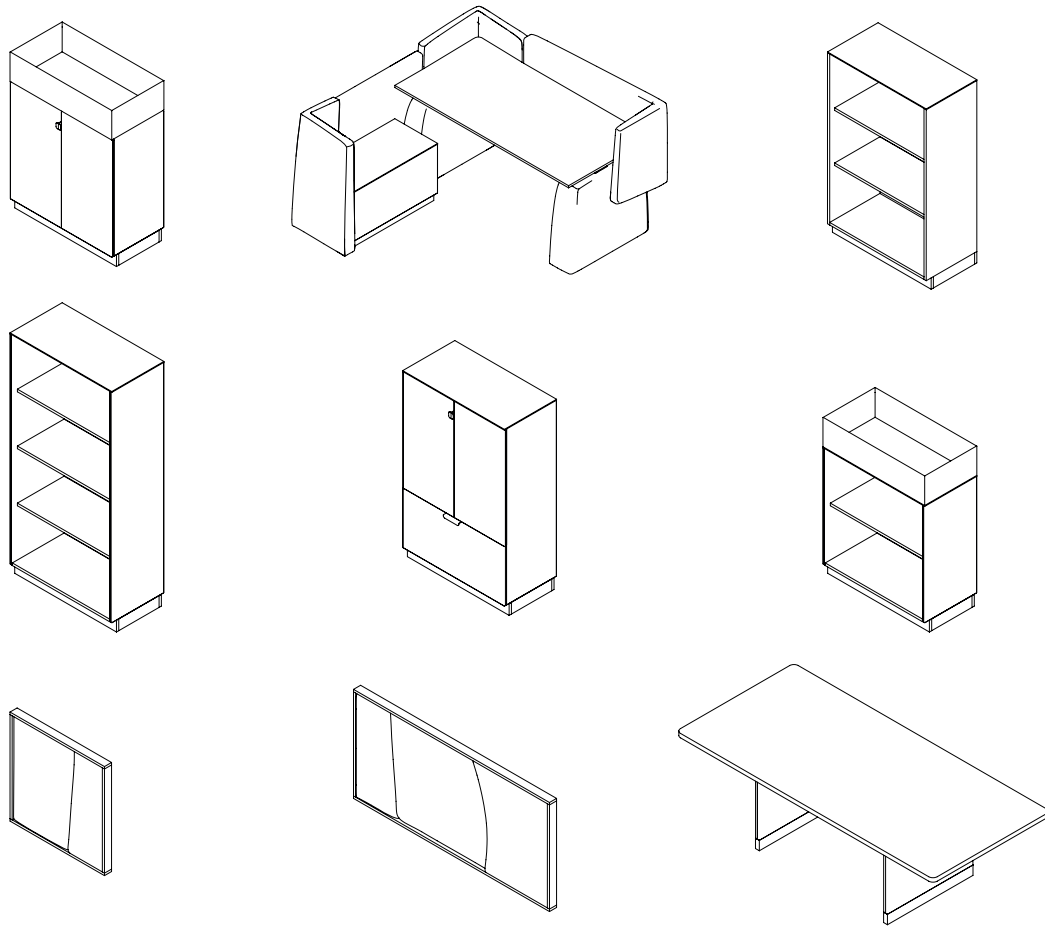

Integrated lighting and PIR sensor for energy efficiency.

Seating options include a pouf or a standing-height table

Soma

acoustic workspace

A refined acoustic furniture system designed to shape space through sound, comfort, and calm. Soma enhances focus, reduces cognitive fatigue, and supports healthier, more balanced work environments. By integrating acoustic performance with thoughtful design, it helps create spaces that respond to modern work rhythms while promoting wellbeing, clarity, and productivity.

Acoustic performance

Soma offers a flexible, modular system that integrates panels, desks, storage, and screens into cohesive layouts. Designed to evolve with changing needs, it allows you to create focused workstations, collaborative zones, and quiet retreat areas—all within a consistent visual language.

Reduces reverberation and improves speech clarity.

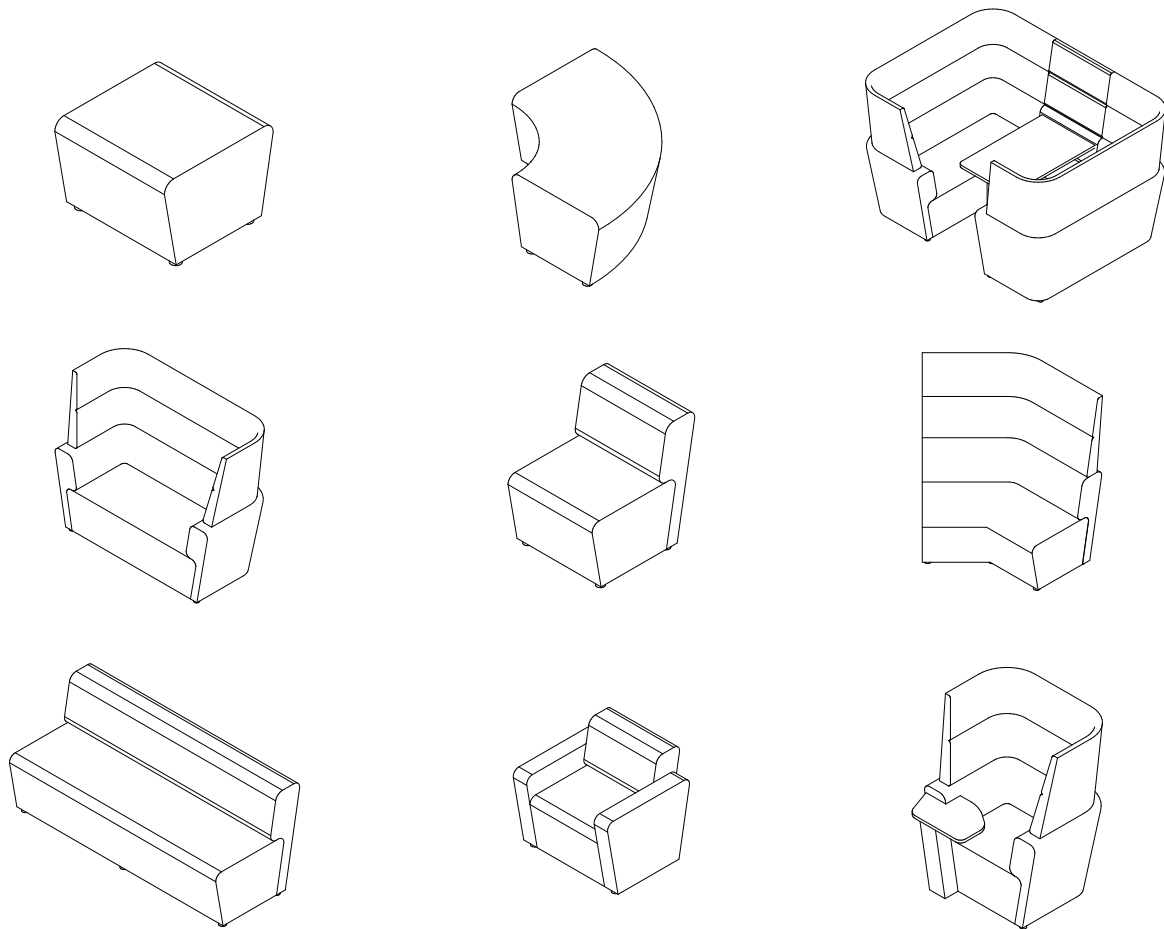

Focused environments

Built around neurodesign principles, Soma helps reduce noise and minimize distractions in high-traffic environments. Its soft forms and integrated acoustic elements improve speech clarity and overall comfort, supporting concentration and a sense of calm throughout the workspace.

Meticulous craftsmanship and timeless forms for lasting impact.

N-ally

modular architectural

A highly adaptable modular seating system designed to define and structure spaces with clarity and purpose. N-Ally combines architectural flexibility, acoustic performance, and refined materials to create dynamic, responsive environments that support both collaboration and focused work.

Modular versatility

N-Ally offers a versatile system available in both curved and straight modules, enabling a wide range of layouts—from collaborative booths and breakout areas to statement seating arrangements. With low, mid, and high back options, it allows you to tailor privacy, comfort, and functionality to suit any space.

Refined finishes

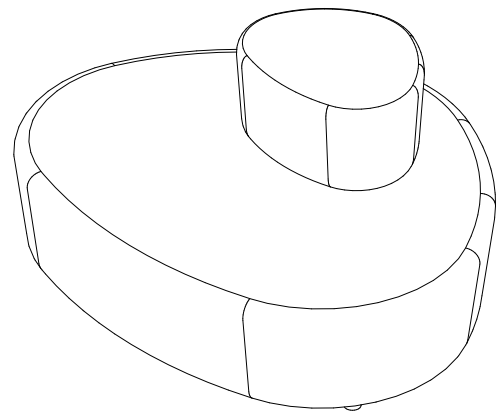

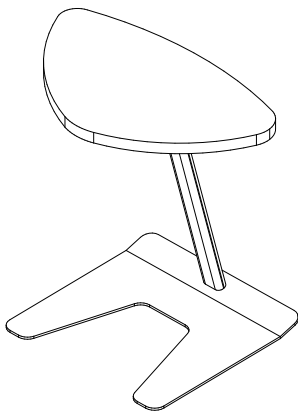

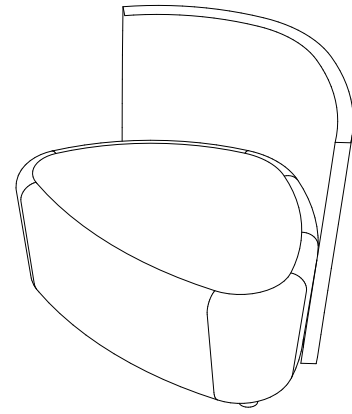

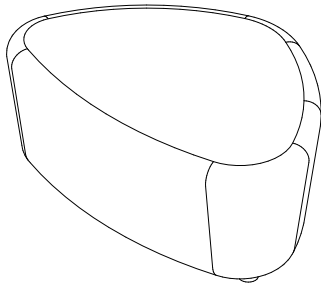

Combining form and function, N-Ally is available in laminated or upholstered finishes to suit different interior styles. Premium upholstery options, including 100% wool fabrics, enhance comfort while adding warmth and texture, seamlessly integrating with both modern and classic environments.

High-back elements support privacy and reduce distractions.

Low, mid, and high-back options define space and function.

Muda

organic breakout

A refined collection of breakout seating inspired by the soft, natural forms of smooth stones. Muda brings a sense of calm and balance into interiors, combining organic aesthetics with contemporary design to create inviting, relaxed environments.

Organic versatility

Muda offers a family of seating elements in small, medium, and large sizes, allowing for flexible arrangements across different spaces. Options with backrests and integrated tables support a variety of uses - from casual meetings and focused work to informal relaxation - adapting seamlessly to changing needs.

 Soft, stone-inspired forms create a natural and calming presence.

Natural expression

With its sculptural, stone-like forms and soft upholstery, Muda introduces warmth, texture, and a calming visual language. The design blends seamlessly into both modern and more natural interiors, creating harmonious spaces that encourage comfort, interaction, and quiet moments.

 Options with backs and tables support work, rest, and interaction.

Rift

open booth

Rift is a modern and versatile booth designed for workplaces that demand flexibility and privacy. Built around a durable 40 mm metal frame, it delivers a clean, industrial aesthetic while ensuring long-term performance.

The structure supports a range of customizable timber and upholstered panels, allowing each unit to adapt to different needs — from focused individual work to collaborative meetings or integrated media setups.

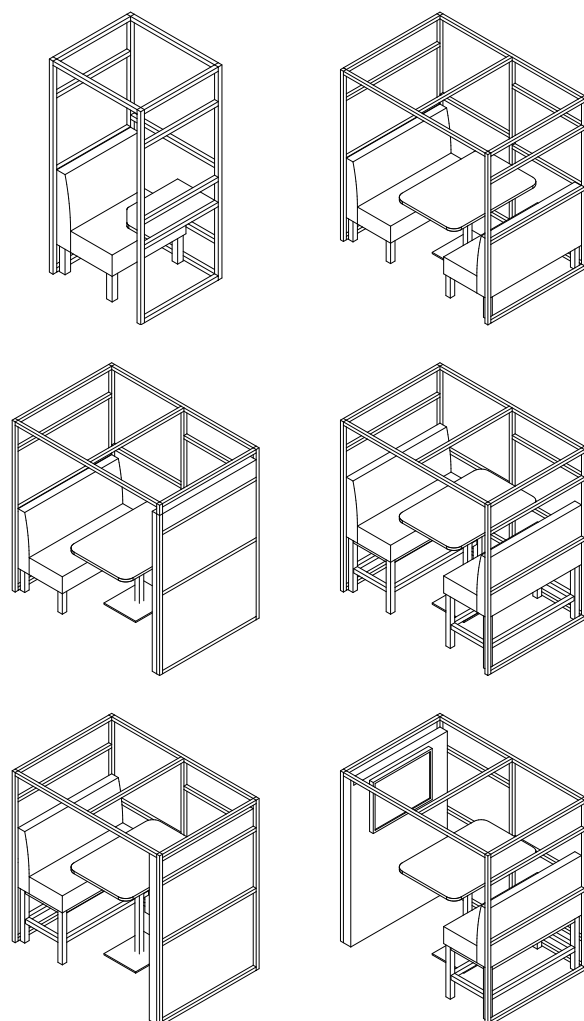

Rift is available in multiple seating heights and configurations, including 1-, 2-, and 4-person units. Its modular and agile design makes it easy to move, reconfigure, and evolve with changing spaces.

40mm metal frame ensures durability and stability.

Timber and upholstery options adapt to different interiors.

Solus

private work pod

Solus is a versatile pod range designed to support focused, independent work in busy environments. By creating a quiet, enclosed space away from noise and distractions, it helps improve concentration, wellbeing, and overall productivity.

Focused privacy

Designed as a personal retreat within the workplace, Solus offers acoustic comfort and visual separation. Its enclosed form reduces distractions, making it ideal for individual work, calls, or moments of concentration.

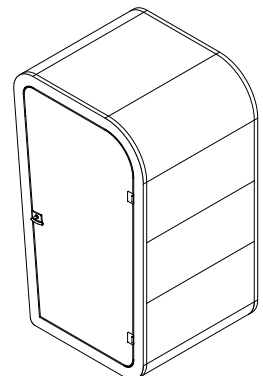

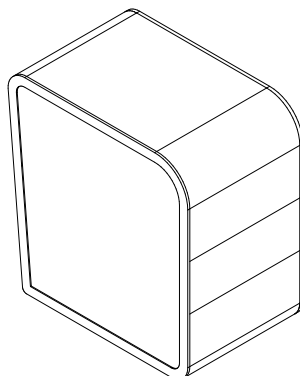

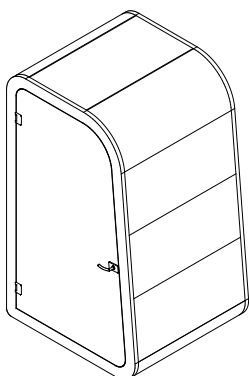

Designed to minimise distractions and enhance productivity.

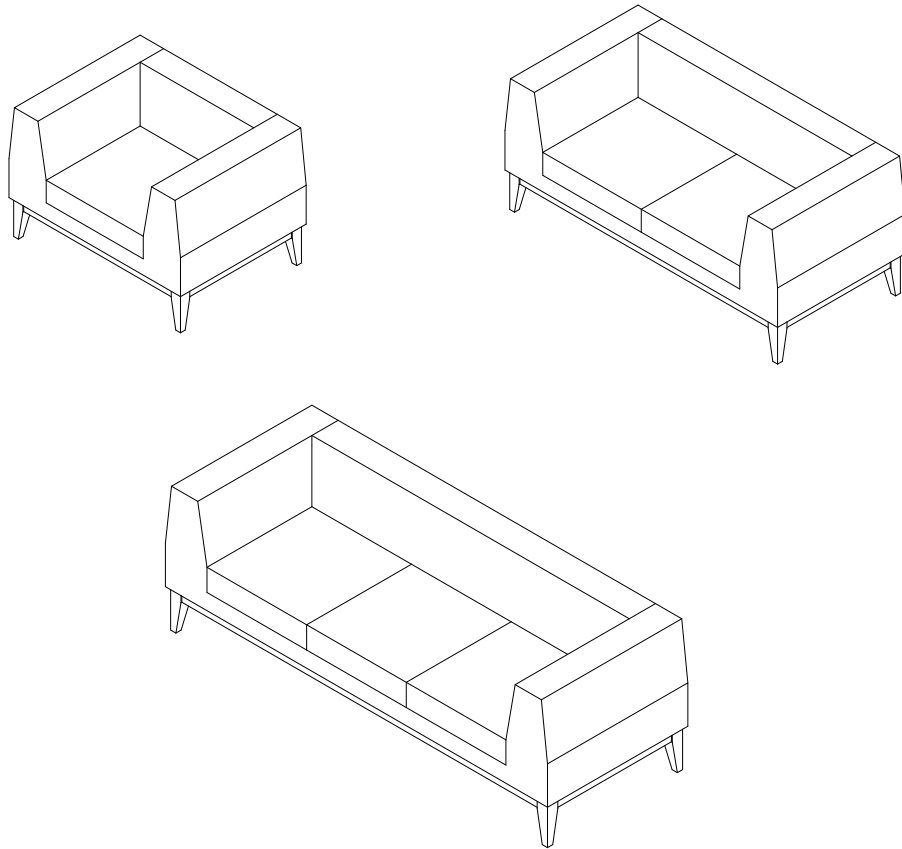

Flexible functionality

The Solus range offers multiple configurations - from fully equipped office pods to compact units for calls and booth pods for small meetings. Integrated lighting, power, ventilation, and finish options allow each pod to be tailored to specific needs.

From single pods to collaborative booth solutions.

Verta

organic breakout

A refined seating collection designed to bring the comfort of home into modern breakout spaces. Verta combines a soft, residential aesthetic with the durability required for high-use environments, creating inviting areas for relaxation, collaboration, and informal work.

Comfort-led design

Verta is designed to support wellbeing in evolving workspaces, offering a relaxed and welcoming seating experience. Its soft forms and generous proportions encourage users to unwind, connect, or work in a more casual and comfortable setting.

 Brings the warmth and softness of residential seating into the workplace.

Everyday durability

Blending residential warmth with contract-grade performance, Verta delivers both comfort and practicality. Its robust construction ensures long-lasting use, making it ideal for offices, lounges, and shared environments where both style and resilience matter.

 Supports informal work, collaboration, and downtime.

Session

enclosed booth system

Session is a refined booth system designed to create private, comfortable spaces for meetings, calls, and focused work. Its timber outer shell and upholstered interior enhance visual warmth and acoustic performance, helping reduce noise and distractions.

Available in configurations from compact telephone pods to 2, 4, and 6-seater booths, Session adapts to a variety of needs. Options include flat, pitched, or open-top designs with glass-front doors for privacy and openness.

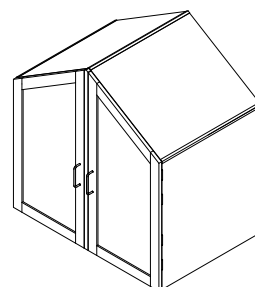

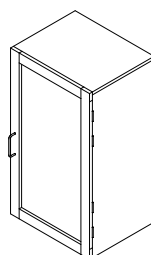

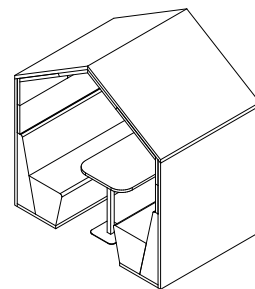

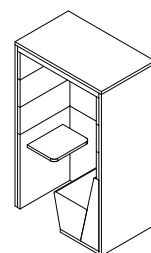

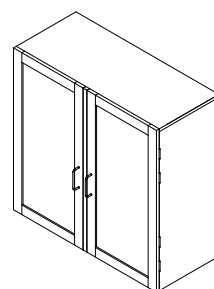

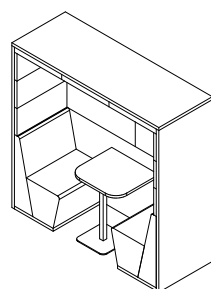

With integrated features such as ventilation, power, lighting, and media support, Session is a practical solution for modern breakout and collaboration spaces.

Designed to create private and comfortable meeting spaces.

Optional power, lighting, and media integration.

Stream

versatile soft seating

Stream is an accessible and versatile soft seating range designed to suit a wide variety of spaces and budgets. With a cohesive collection of booths, benches, sofas, chairs, and modular elements, it offers flexible solutions that can be easily configured to meet the needs of any project.

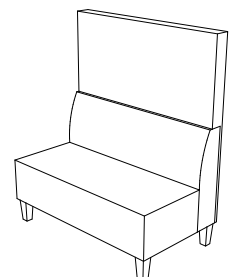

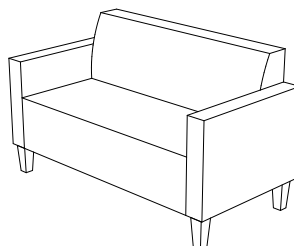

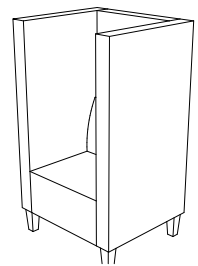

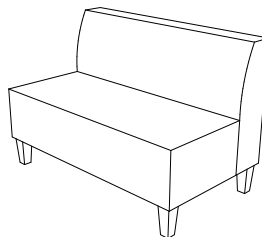

Available in 2, 4, and 6-person booth options, Stream supports informal meetings and breakout areas. With a choice of wooden or chrome legs, and optional power and connectivity, it provides a practical and adaptable seating solution for modern environments.

Easily adapts to different layouts and project needs.

A practical solution that balances quality and budget.

Thinkpod

collaborative ideation pod

ThinkPod is a flexible pod system designed to support creativity, collaboration, and dynamic ways of working. It creates dedicated spaces where teams can connect, think freely, and develop ideas.

Available in single, two, four, and six-person configurations, ThinkPod adapts to different group sizes and needs. With options for flat, pitched, or open designs, it fits seamlessly into a variety of environments.

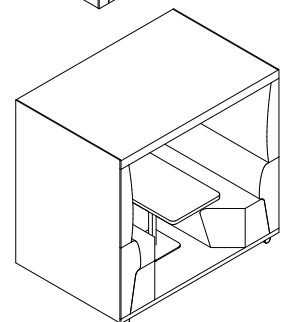

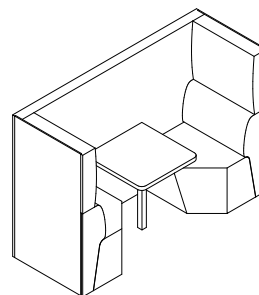

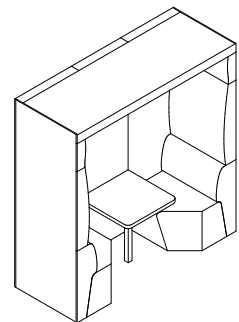

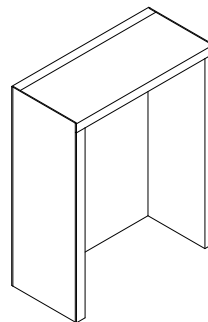

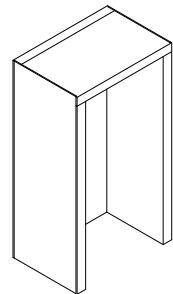

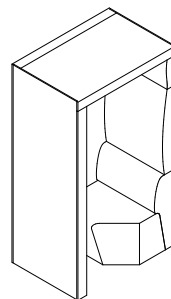

Designed to encourage both focused thinking and collaboration, ThinkPod is an ideal solution for spaces where innovation and interaction are key.

Adaptable configurations to suit different layouts and spaces.

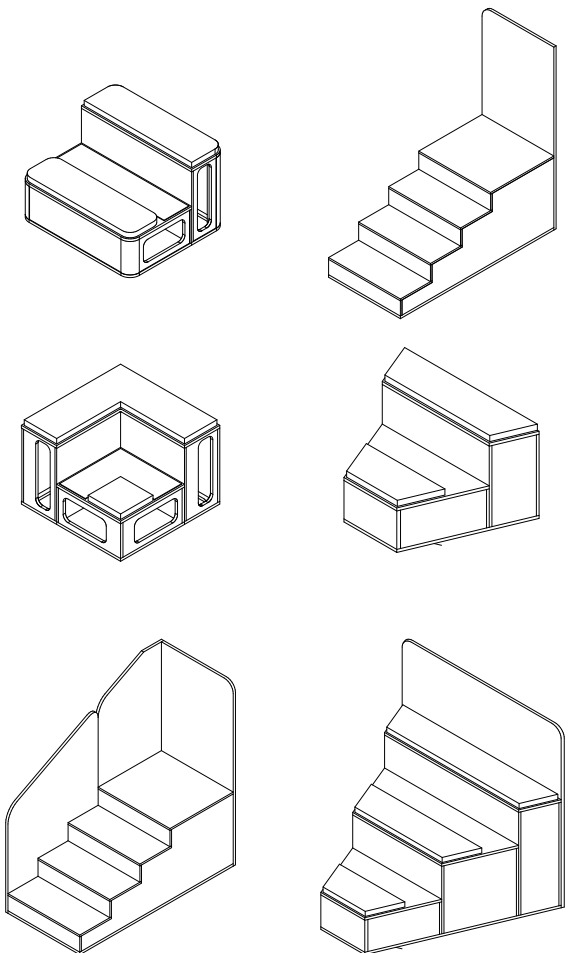

Works across offices, education, and creative environments.

Cavea

tiered seating system

A versatile tiered seating system designed to support collaboration, conversation, and informal interaction. Cavea creates inviting environments for meetings, social moments, and relaxed work settings, making it ideal for offices and educational spaces.

With one to three tier configurations, Cavea offers flexibility for different layouts. Integrated steps, rails, and optional castors allow for easy access and movement, adapting seamlessly to changing environments.

Its modular design supports both small and large breakout areas, while open storage adds practical functionality. A wide choice of finishes - including lacquered ply, laminated tops, and upholstered cushions - ensures Cavea fits a variety of interior styles.

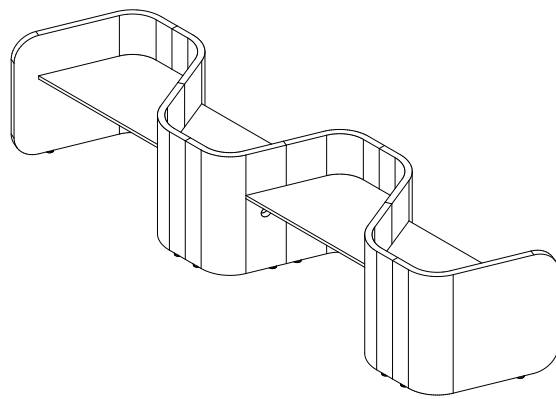

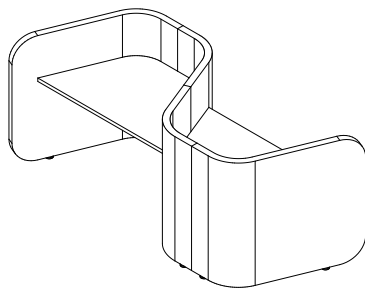

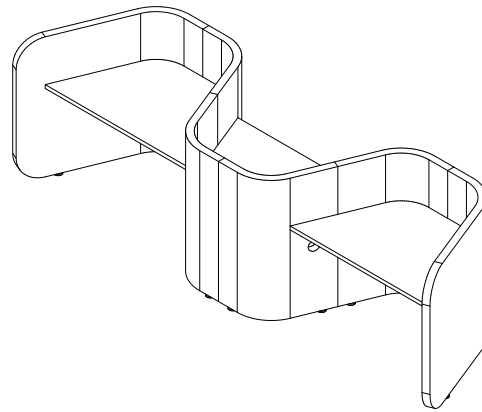

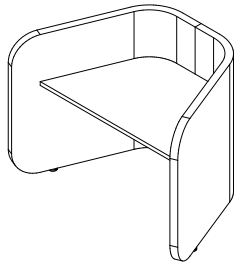

Available castors and components for easy repositioning.

Functional design with open storage solutions.

Flexi Pod

Flexi Pod

acoustic workspace

Flexi Pod is a versatile solution created for today's dynamic workplaces and educational spaces. It provides individual workstations that enhance focus and productivity while allowing complete flexibility in how spaces are arranged.

Modular versatility

With integrated acoustic panels, Flexi Pod helps reduce noise and minimize distractions. It creates a calm, private environment - perfect for focused work, studying, or tasks that require concentration.

Refined finishes

Flexi offers a wide range of configurations - from single-user pods to collaborative zones and breakout areas. Its modular design allows you to easily adapt layouts to suit your space, whether you need quiet workstations or interactive environments.

Reduces noise
and improves focus.

Creates zones
without closing the space.

Flexi Focus

acoustic pod for deep focus

Designed for offices and educational spaces, Flexi Focus creates quiet, comfortable zones that support concentration and individual work. Its advanced acoustic properties reduce distractions while maintaining a sense of openness.

The modular design allows for seamless runs of workstations, easily adapting to changing layouts. From single pods to larger configurations, Flexi Focus supports both focused work and semi-private collaboration.

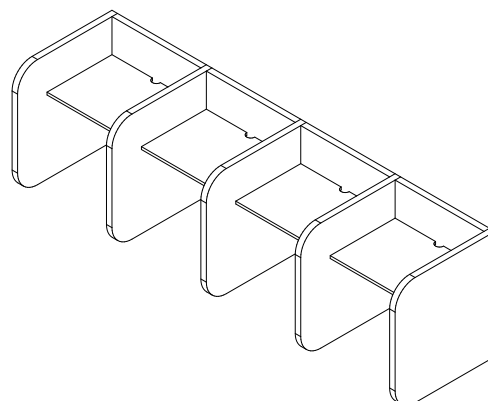

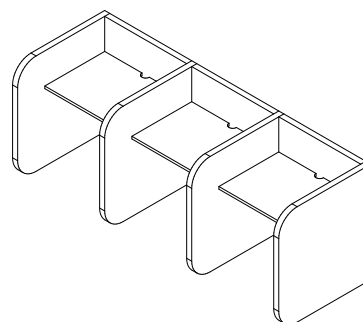

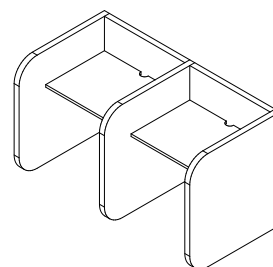

A modern solution that optimizes space, enhances comfort, and improves productivity in dynamic environments.

Adaptable configurations to suit different layouts and spaces.

Works across offices, education, and creative environments.

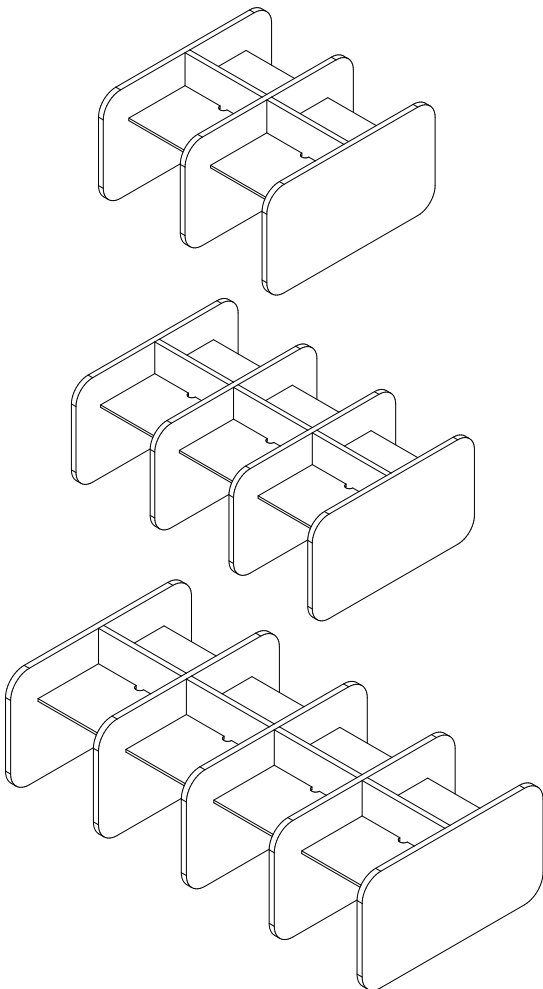

Flexi F2F

acoustic pod for collaboration

Flexi Face to Face is designed to support communication, teamwork, and natural interaction in offices, universities, and coworking spaces.

Its modular structure enables single, double, or multi-user setups. The open design encourages idea exchange, while integrated panels provide acoustic comfort and subtle separation.

With optional mobility and flexible configurations, F2F easily adapts to evolving needs - combining functionality with a clean, contemporary aesthetic.

Available castors and components for easy repositioning.

Available in multiple height options

Flexi Square

Private acoustic work pod

Flexi Square is a compact workspace pod designed for individual focus in busy environments. Its soft, rounded geometry combines clean aesthetics with ergonomic comfort, creating a calm and dedicated place for deep work.

Focused privacy

Enclosed on multiple sides, the pod provides both visual and acoustic separation. It minimizes distractions and external noise, making it ideal for individual tasks, video calls, and moments that require full concentration.

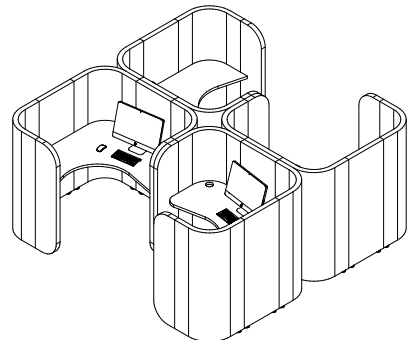

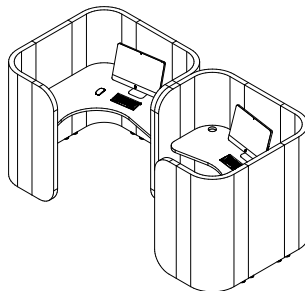

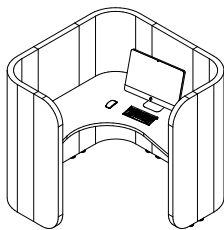

Designed to minimise distractions and enhance productivity.

Flexible functionality

Built as a versatile solution, Flexi Square integrates seamlessly into a variety of office layouts. Its modular nature allows it to function as a standalone unit or as part of larger configurations.

From single pods to collaborative booth solutions.
